PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 10/821,295	Applicant(s) LUNNEBORG ET AL.	
	Examiner Daniel L. Robinson	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 10-24 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Petition Decision***

***Response to Election***

Applicant's election without traverse of Claims 1, 8-17 and 29-30 in the reply filed on 9-25-2006 is acknowledged.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 8-10 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Usui et al.(U.S.Pat.6,287,484) in view of Lloyd(U.S.Pat.5,994,681). Usui discloses a magnetic heater that shows many of the feature of the claimed invention but fails to show explicitly relative movement of a magnet in response to a change in the rate of rotation to a frame. Lloyd discloses an apparatus for eddy current heating a body of graphite that shows a relative motion of magnets dependent on rotation speed. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to have relative motion of a magnetic based on rotation speed so as to change the air gap.

Applicant's arguments filed 10-24-2007 have been fully considered but they are not persuasive. Applicant's argument that there is no disc shaped conductor please note that Usui discloses a "disc shaped conductor" which may be made by "pasting an

eddy current member on the surface of a magnet", providing portions of both conductive and nonconductive parts.

***Allowable Subject Matter***

Claims 11-14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 29-30 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reed, Kuznetsov and Bell are cited to show structure similar to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L. Robinson whose telephone number is 571-272-4788. The examiner can normally be reached on m-f 5:30-2:30.
